Subject: disgusted

I would like to put just a few comments together for the Justice Dept. I believe that in the past and certainly in the future, there will be dominating companies that strive for the best for everyone. Certainly, that will bring about anti-trust actions to stay ahead in the future. Microsoft has become a dominant player in computers and are trying to become a player in video games. If they become the dominant maker of video games in a year are you going to break up that division on MS and tell it to become a separate company? The Gov't wants people to become better than why pay for farmers to leave crops empty? Why support failing industry's like Tobacco? Let the control be a democracy and let The Free Market dominant and let the USA become a better and stronger country for it!

Thanks,

Steve Behrens
